C.N.R. R'LY MAN MEETS DEATH FROM TRAIN

"Ted" Bull, of Mirror Falls from Car While Switching at Elnora

A gloom was cast over the town on Tuesday when word was received that Edwin Bull, known to all as "Ted" had met with a fatal accident at Elnora while on duty as an employee of the C.N.R. How it actually happened is hard to explain, but in some manner he fell from the top rung of the ladder of a car and was caught beneath the guard boxes. His working comrades were only a short distance away and rushed to his assistance, but help was of no avail as he passed away not more than two minutes after with no suffering whatever.

"Ted" came to Mirror about 15 years ago and had been a steady and conscientious employee since 1911. He was of an outgoing nature and ever ready to render help and work in co-operation with his companions, who feel his untimely loss keenly. He was beloved by everyone, an example of a citizen that could not but make life time friends, a kind and home-loving man, and had just purchased a home in Mirror.

The funeral, which was under the auspices of the Masonic Order and conducted by the Rev. R. G. Wood, took place today (Thursday), a private service being held at the home after which a public service was held in the Union Church, which was crowded to the doors by friends paying their last respects to one who while passing from this world left an indelible mark of a perfect manhood and friend upon those who remain. Mrs. Melvin Olson sang a beautiful solo, "He Wipes The Tear From Every Eye". After the service the remains were conveyed to the station where a special train, donated by the officials of the C. N. R. and manned by companions, stood in waiting for the journey to Stettler where interment was made. The deceased, who was born in Wiarion, Ont., Feb. 10th, 1891, leaves besides a widow and two children, two sisters, Mrs. Nichols of Transcona and Annie of Calgary and four brothers, John of Grimsby, and William of Woodstock, Ont., and Ray and H. W. of Stettler.

The esteem in which "Ted" was held was exemplified in the number of beautiful floral tributes which backed the casket.

The sympathy of the entire community goes out to the sorrowing family in the passing of a loving husband, father and brother.

Farewell Party for Robert Wise

The old timers of the Mirror and George districts gathered on Thursday evening at "Sunnycrest" the home of Mr. and Mrs. C. R. Brewster for a farewell surprise party to Mr. Robert Wise. Mrs. Brewster's father, who is returning to his old home at Omaha, Neb. During his stay in Mirror he has endeared himself to a wide circle of friends who delighted in the opportunity of expressing a continued friendship toward this revered gentleman. Owing to his age and somewhat poor health he has been unable to go about as much of late as he did when first coming to the district, but his genial personality and ready wit have always rendered him an interesting and delightful companion. The evening was spent in social intercourse, with music and readings interspersed, followed by a dainty lunch, after which on behalf of the Mirror district, Mr. Wise was presented with a leather autograph album in which were the signatures of those present, and from George district a handsome book in bound leather. Mrs. Brewster was remembered with a pretty gift. The presentations were made by Rev. R. G. Wood on behalf of the donors. This memorable occasion concluded with the singing of old songs followed by Auld Lang Syne.

Mr. Wise will be accompanied on his trip by his daughter and son-in-law, Mr. and Mrs. Johnston, of Omaha. He will divide his residence between them and his son, Rt. Rev. Dr. Wise, Bishop of Kansas, who resides at Topeka.

Wife and Husband Both Ill With Gas

"For years I had gas on the stomach. The first dose of Adlerika helped. I now sleep well and all gas is gone. It also helped my husband." (signed) Mrs. B. Brinkley. ONE spoonful Adlerika removes GAS and often brings astonishing relief to the stomach. Stops that full, bloated feeling. Brings out old, waste matter you never thought was in your system. Adlerika is wonderful for chronic constipation. Devereaux Drug Co.

WORLD HAPPENINGS
BRIEFLY TOLD

A referendum on the prohibition of spirits is proposed in the space from the throne, read at the formal opening of parliament at Oslo, Norway.

The North West Territories imported under permit last year 320 gallons of intoxicants. Permits issued totaled 164.

More British peacemakers became extinct in 1925 than in any twentieth century year except 1915, also titles above the baronetcy rank passing.

Admission charges to the museums controlled by the city of Paris, including the Carraevet, have been raised from three to six cents.

Fully 20,000 persons lost their lives and thousands of families are homeless as the result of the recent floods which swept the state of Nayarit, Mexico.

The appointment of John Leslie as vice-president and controller of the Canadian Pacific Railway, is announced by E. W. Beatty, chairman and president.

"Nice juicy strawberries, only 34 a quart," he cried across the fields in Philadelphia and the market bureau declared the price the highest on record for the berries.

With only five members of the Ottawa Unemployed Association having paid their monthly fee of 10 cents and therefore eligible to vote, the association voted itself out of existence by three votes to two.

Legislation will shortly come into effect in England providing for the suspension for 12 months of a driving license to follow automatically the conviction of a driver of an automobile for drunkenness.

St. Henry Thomson, president of the Canadian National Railways, will throw the weight of his influence into the promotion of plans to provide ocean carriers from Canadian ports for Canadian goods, according to a statement made at London.

After several years in Ottawa, where he occupied the post of news editor for the Canadian Press, Harold Raine, former Winnipeg newspaperman, left for New York. He has been appointed to one of the important positions in the Canadian news-gathering organization, that of superintendent of the New York bureau.

A Notable Comparison

U. S. Spends One-Third More On Pleasure Than On Education

The people of the United States, according to the latest statistical digest, a monthly publication, spend almost twice as much in tobacco as on public school instruction. The women in the Republic spend more on cosmetics, perfumes and soft drinks than it expended in public education. We do not for a moment depreciate the expenditure of money for these things—they keep industry going—but we simply call attention to the expenditures by way of comparison, as in the United States, as well as in Canada there is a constant complaint over the costs for educating the children of the States. The Canadian women and men spend equally as much for tobacco, perfumes, cosmetics, drinks, gum and candy as do the people of the United States, three dollars for personal delights to 11 for public instruction, the most essential thing in democracy—Klinton Whig.

Economy In British Army

War Office Demands Use of Iron Straps For Cavalry

British cavalry officers have been trembling in their boots because of an economy wave which has swept through the war department. Spurs have been taken down a bit in their shine and polish, but their glaze has not been interfered with. Spats in the army came under the ban some weeks ago as unnecessary. Now the shoddy straps, of which the cavalrymen have been proud, are being replaced by iron straps, which are cheaper, and the officers' spurs to be handed out by the department are to be of a steel substitute which will still shush but not cost the government so much money.

Find Skeletons Painted Red

Human skeletons painted a deep red have been found by Russian archaeologists in the vicinity of Simferopol. They are believed to belong to the Christian era which inhabited the coast of Kertch Bay 2,000 years before Christ. It was the custom of this ancient race to cover the corpses of their dead with ochre, which was believed to preserve the bodies against decomposition.

Men in advance of their age may be as useless as a clock that runs too fast.

CLIPSE FASHIONS
Exclusive Patterns
by Skilful Design

Two-Piece Costume Approved By Smart Women

Two-piece sport and tailored costumes are things of much more elaboration as far as fabric is concerned, than those worn earlier in the season, which were usually developed in jersey and crepe. Now the model attitude is toward making these costumes in crepe satins and velvet, or a combination of both. In the model pictured here satin has been chosen for the new finger-tip length blouse and velvet for the skirt. The velvet was employed to fashion the snug-fitting collar, cuffs and trimming bands. The skirt is joined to a bodice top and has two inverted plaits at the front to add freedom and the latest flared movement. The diagram shows just how to put the dress together, and No. 1245 is in sizes 36, 38 and 20 years (34, 36 and 38 inches bust). Size 38 (36 bust) requires 4 1/2 yards 36 inch or 2 1/2 yards 44-inch material. The bodice top of skirt requires 1 1/2 yards 36 inch additional material, with ribbon strap over the shoulders 1/2 yard. Price 25 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Want "Leap Year" Week

German Splinters Want More Chances To Secure Husband

German splinters weary of indirect methods of snaring the elusive male are asking for a recognized "Leap Year" week in each year, during which it shall be their privilege to propose.

The idea has been presented to the government marriage bureau and proposes that there be each year not one, but seven days dedicated to St. Catherine, the patroness of unmarried women.

Several splinters' organizations are backing the proposal.

Officials of the marriage bureau say that when a girl in Germany is 27 years old and unmarried her chance of getting a husband are about one in five. Although the number of marriages has been restored to pre-war figures, it is notable that those between middle aged men and comparatively young girls are more and more frequent.

Gives Satisfaction

There is nothing else as satisfactory in this life as to accomplish something without anyone's aid.

A hearty mental vote of thanks to one's own self is the most inspiring sensation one can ever experience.

Queen Alexandra Memorial

A fund of about \$45,000 is to be subscribed for a national memorial to the late Dowager Queen Alexandra. The money will be used to assist Queen Victoria's Jubilee Institute of Nurses.

Manitoba Government Phones

The Manitoba Government telephone system completed its fiscal year with a profit of \$150,000, a surplus of nearly \$85,000 over the estimated revenue.

Our idea of a great man is one who has traveled extensively and neither lectures nor writes about it.

Another Great War
Would Crush Civilization

Premier Baldwin Reads Lesson From History of the Roman Empire

Grave warnings of danger arising from the loss of many of the best British lives in war was uttered by Premier Stanley Baldwin in his presidential address at the meeting of the Classical Association in London. After dwelling on the history of Greece and Rome, the Premier said the time came in the history of the Roman Empire when there were not enough Romans to carry on the work of Rome.

There were fears among those in responsible government today that war, by the destruction of the best lives in such great numbers, had left Britain without enough of her breed to carry on the work of the British Empire.

"Our task is hard enough but it will be accomplished," Mr. Baldwin said. "Yet who in Europe does not know that one more war in the west and the civilization of ages will fall with as great a shock as that of Rome. She has left danger along the road. It is for us to read them."

Mr. Baldwin added that for nations of Western Europe who, in historical times, have been members of the same great empire, to be at war was "fratricidal insanity."

Prosperity For Canada

No Doubt That Cerner of Depression Has Been Turned

For some time past business men and economic observers in Canada have been saying that trade in the up grade, and that the corner of depression since the war has been turned. Now there seems no doubt of it. Figures to the end of November have been issued at Ottawa and they show that Canadian exports are sixty million dollars more than in the previous year, and about four hundred and seventy millions more than in 1923. There is this year a favorable balance of trade of \$345,000,000 in exports over imports. That is a tremendous contribution to national prosperity and means a substantial amount in individual comfort and happiness.

Much of this is due to the big field crops, the second largest on record, and, of course, when the farmers of the west have money, it follows that industry in general is going to boom. The real results of the late harvest will be seen in the manufacturing section next year.

Burmese Ex-Queen

Was Smaller Figure Said To Be Influence Behind Mandalay Massacre In 1929

A romantic and sinister figure was rumored from Burmese life when, at her bungalow at Hangoon, the ex-queen, Supayalat, widow of King Theadaw, died from heart failure at the age of 67.

Upon the death of King Mindon in 1879, one of his wives set up successfully for her daughter, Supayalat, to marry Theadaw. There followed in 1879 the massacre of Mandalay, in which the late King's sons, their wives and children and others were murdered. Supayalat was alleged to be the influence behind all Theadaw's acts then and in the chaotic reign which followed.

Winnipeg As A Convention City

Twenty-six Conventions Are Already Listed For This Year

Winnipeg next season will entertain twenty-six conventions, a large number, with an aggregate attendance of approximately 15,000 persons. In addition many large tourist parties will arrive for their itineraries to include Winnipeg and Manitoba, so that the cross tourist and convention travel will far eclipse any previous year. This is the report of the director of Manitoba tourist and convention bureau after a mission to the United States. He places these figures as conservative and states that Manitoba will be the second in 1926 of many thousands of United States holiday makers.

Must Trade Mark Goods

Turkey Takes Steps To Safeguard Foreign Trade

"After three months, all goods produced in Turkey must bear registered trade marks. This order is the outgrowth of a situation that has been detrimental to the country's trade. It appears that Greek and Armenian refugees, living in Greece and Bulgaria have been sending to foreign markets silks, furs and raisins of an inferior quality, but marked 'Turkish'."

Forget the good you have done to others and the evil they have done to you if you would be happy.

More tin is produced in Alaska than in all of the rest of the United States combined.

ON THE AIR

What Is Doing in the World of Radio

Straight advertising over the radio is selling clothes, paint, women's frocks and a dozen other commodities every day in Seattle.

The only kind of radio receiver found useful in mountainous Switzerland is the many-tubed set. Cheaper sets can't combat the interference offered by mountains and valleys.

In 1909 the first wireless communication was established between England and France. Today regular radio communication is possible not only between England and France, but also between America and Europe.

A Canadian Government radio station opened at Ahluik, within 60 miles of the Arctic Circle, is in touch with Edmonton, Alberta. This makes the fourth station in a chain to link the Arctic region with civilization.

Following restoration of atrophied oral nerves in two deaf mutes through listening in on three-tube radio sets, Theo. Rodwell, superintendent of the Manitoba School for the Deaf, has ordered several instruments and amputees encouraging progress with gangster mutes.

Calgary recently witnessed the delayed last meeting of the Alberta Radio Experimenters' Association, an organization to promote radio research in the province of Alberta. Addresses were given by a number of the members on technical subjects, covering research work done since the last meeting some months before.

Will Handle Canteen Funds

Winnipeg Government Appoints Three Members For Provincial Board

The announcement has been made by the Saskatchewan Government of the appointment of Charles Gordon Cox, of Saskatoon, physician James McGee, Regina, and Alberta White, of Regina, as members of the provincial canteen fund board, as provided for in the Federal Canteen Funds Act.

This board, appointed by order-in-council of the lieutenant-governor-in-council of the province of Saskatchewan, will have charge of the administration, for three years, of the share of the residue of the canteen funds of overseas regiments from this province, which share has been allocated to the province and will be paid when the appointments have been made.

The three members of the board, who will serve without remuneration, will be charged with the duty of receiving, holding, administering, or providing for the administration by others of the share of the residue of the canteen funds.

Fixed Hours Of Rest

Residents of Constantinople Are Protected By New Law

Constantinople has become a model city for persons who weak nerves or irritable dispositions.

Under a morality edict, the hours between midnight and two in the afternoon and between midnight and morning are to be regarded strictly as hours of rest for the population.

During these periods residents of houses are not to be disturbed by the playing of kirdy-girdies, phonographs or pianos, or by the raucous cries of peddlers, knife sharpeners, old clothes hawkers, or itinerant hawkers generally.

Further another edict, housewives are forbidden to beat carpets, chop wood, or to hang out washing in the public streets except on Thursdays. In a third ordinance it is forbidden to stretch oneself out on the pavement or in the roadway, or to ride either a horse or a bicycle, or to drag a handcart on the pavement.

Saskatchewan Hog Pool

Will Send Delegation To Europe To Study Bacon Industry

Officials for the proposed Saskatchewan Hog Pool have been opened in Saskatoon. Meetings are being held at various points throughout the province and volunteer organizers are now in the field. A fund is being supported by the Farmers' Union to send a delegation to Great Britain, Ireland and Denmark to study the bacon industry there.

Recognize Only Civil Marriages

Church weddings are being dispensed with in Soviet Russia, because of their expense and also because religious marriages are no longer recognized by the state. Many young couples now go straight to the state marriage license bureau, where they can be made man and wife in five minutes at a cost of \$1.60.

Kind words never did except when killed by inarticulate.

 - 54—Human beings.
 - 56—Chief.
 - 57—Negative.

Mennonites Return

Seeking to Purchase Old Home Or New Land in the West

A recent Canadian Press dispatch dealing with the return of a number of Mennonites to Western Canada reads as part follows:

"Groups of Mennonites, who in 1922 and 1923 disposed of their large farm holdings in Western Canada and went to Mexico, have returned here recently to get back after suffering extreme hardships and privations through crop failures.

"The Mennonites, originally natives of Russia, are a religious sect opposed to war and ferocious ways of having their own schools and churches in the western districts they lived in communities, a thrifty hard-working people, though in many cases opposed to Canadian administration, especially the school question, and they met with great criticism during the war for their objections against taking up arms in the defence of their adopted country.

"When the trek started to Mexico, some of the finest farming country in Manitoba and Saskatchewan was sold by the Mennonites. Those who have come back are seeking to purchase their old home again, or are purchasing new land, willing to abide by Canadian laws and to live in peace."

Kemal Pasha Rules Turkey

No One Thinks Of Doubting His Wisdom and Greatness

For the moment Mustafa Kemal Pasha is everything and everybody, says J. A. Spender, editor of the Westminster Gazette, in another of the special articles he is contributing to his paper from Turkey. Whatever the Turks may privately think of the westernization policy introduced by the president, Mr. Spender writes, no body dreams of reflecting on or questioning Mustafa Kemal's decrees or of doubting his greatness and wisdom in this or any other matter. His courage, firmness and insight are compared with the weakness, vacillation and blindness of the old regime.

Instancing the spread of western methods, the editor points that there is not a single fact to be seen in Constantinople nowadays. Hats have been imported in bulk in every train for months past to meet the demand created by Kemal's decree against the fez.

Mr. Spender asserts that while it would be untrue to say that the Moslem religion is being persecuted in Turkey, it is a fact that among the younger Turks the fashion is more and more to speak of the Moslem faith as obsolete and fanatical.

Perhaps, suggests Ignatius Bim, the reason the seraglio was made for rest was because seven days of solid labor would have made one weak.

There are people who think that what is lacking in the modern educational system for the young is the old Chair of Applied Bricks.

Answer to Last Week's Puzzle

Wall Street Paper's Advice

Canada Sitting in a Preferred Position From a Business Point of View

"While you are glancing over world developments in 1925 take a long look at Canada," states a recent editorial in the Wall Street News, published in New York City. Continuing, the editorial reads, in part: "An agricultural country, primarily, Canada has added vastly to her wealth this year. The Dominion bureau of statistics estimates the value of the field crops at \$1,112,691,000, a gain of \$117,965,960 over 1924 and of \$213,000,000 over 1923. These are striking figures, but the chances are that the aggregate for this year is decidedly conservative. If the wheat yield should not prove finally to have been with a great deal more than the estimated \$466,755,000, such a result could come only from some violent reaction in prices which seems impossible at the moment."

"Sir Vincent Meredith, chairman of the Bank of Montreal, recently informed the bank's stockholders that wheat would probably bring in \$598,000,000 new money from this year's crop. On the basis of a price of \$1.50 per bushel, the 155,000,000 bushels remaining to be sold, if added to the receipts from the 142,000,000 bushels previously exported, would expand Sir Vincent's total by \$13,000,000 or so and value the government estimate in prices which seems impossible at the moment."

"Canada is sitting in a preferred position with a large exportable surplus still to be sold at present prices. The wheat crop was large and the average of other crops was not much different from that of 1924; some wheat back while others increased. Increased wealth should bring in its wake increased purchases of manufactured goods. It looks like a good business year north of the border in 1925."

Island of Yap

The island of Yap, which has suffered from a severe storm, is by far the most important cable station in the Pacific. It has a branch of the American Pacific cable to the Philippines, and has branch lines radiating to Japan, to Shanghai and to the Dutch East Indies.

"Waiter, this napkin is badly soiled." "No, sir, only on one side—I folded it the wrong way."

Garnet Wheat Has Created Keen Interest With Farmers Throughout Western Canada

The satisfactory results of tests to which Garnet wheat has been subjected has aroused keen interest throughout Western Canada. Garnet Ottawa 652, is the latest variety of wheat developed at the central experimental farm at Ottawa.

According to reports, prairie farmers, anxious to try out the new wheat, are flooding the government experimental stations serving their respective districts with applications for test seed. Although preliminary milling and baking tests have been made, more thorough tests will be conducted before the seed is released for general distribution. A limited quantity of seed has been sent to a number of the experimental stations, which, however, has failed to meet the demand.

Giving details of the development of Garnet, when O. E. De Long, B.S.A., assistant superintendent of the Dominion experimental farm at Lacombe, Alta., states that the new wheat has been grown at the Alberta station since 1919. During that period, he says, it required an average of 113 days to mature, while the average for Marquis wheat was 112 days. In further comparing these two varieties, Marquis gave an average yield of 46 bushels 7 opans an acre, against 45 bushels 17 opans an acre for Garnet Ottawa 652.

Continuing, Mr. De Long says: "Garnet Ottawa is somewhat similar to Ruby Ottawa 651, in length and strength of straw. Garnet straw also shows a tendency to develop the ruby coloration, distinctive of Ruby. The shape of its head gives the standing crop the appearance of being a very heavy yielder."

"Garnet appears to be about midway between Marquis and Ruby in tendency to shatter if allowed to become too mature before harvesting."

"The experimental station at Lacombe has never had Garnet Ottawa 652 subjected to frost during the six years it has been grown. For this reason no definite information is available concerning the frost resistance of this variety as compared with the others."

In the opinion of Mr. De Long, Garnet Ottawa has a place in Central Alberta and other districts where Marquis is subject to injury from early fall frosts. Whether advancing the harvest one week in districts where Marquis is not matured by frost or early frost would justify growing Garnet in preference to Marquis, has not been determined.

"Those farming in such districts should keep in mind that Marquis is accepted as the standard milling wheat throughout Canada and the United States," Mr. De Long advises. "They should also remember that Garnet is a new variety and has yet to prove its worth under varying conditions to the same extent Marquis has."

"There is little doubt that Garnet Ottawa 652 will replace Ruby Ottawa 622. These two wheats mature in approximately the same time, but Garnet will out-yield Ruby by several bushels per acre and does not shatter to the same extent."

Finding Farm Loans Costly

Rural Credits Act Has Cost Manitoba \$450,000 Since Its Enactment

Since enactment of the provincial Rural Credits Act, Manitoba has suffered a loss of more than \$450,000, according to a report submitted to Premier J. Bracken.

The report, which was prepared by John Wylie, superintendent of rural credits in the province, indicates that the outstanding principal and interest owing the provinces by the 74 rural credit societies was reduced by more than \$380,000.

The balance outstanding was shown at \$2,336,031, with an additional interest unpaid at \$175,874.

Remots Police Post

The world's most northerly post, also the most remote of any bureau habitation, is to be constructed next year for the Royal Canadian Mounted Police at the far end of Ellesmere Island, in the Arctic.

To Bring Many Immigrants

Four thousand immigrants will be brought to Canada next year by the Lethbridge Immigration board of Canada, according to the programme unanimously adopted by the western branch of the organization which met in annual session at Saskatoon. The settlers will be carefully selected by the board's European representative.

W. N. U. 1919

Purchase B.C. Timber

British Railways Place Large Order For Canadian Products

British Columbia has received an order from one of the greatest of British railway groups for 56,000,000 feet of Douglas fir railroad ties, it is stated in official circles. It is pointed out in the same circles that this is more than British Columbia's total export to Britain in 1923.

"This breaks the buying tradition for more than a century," one authority says, "the British railways have declared their intention of giving preference to Canadian timber, provided that the price and other conditions are equal. Also, for the first time, a great British railway group has inserted in its conditions of tender 'that preference is to be given to Canadian timber.'"

The British Columbia timber industry will be enabled to meet any difficulty with regard to price with the help of the low freight rates granted and the special service provided by the Canadian Government Merchant Marine via the Panama Canal.

The decision of the railway group in question to place the contract for railroad ties in British Columbia follows the recent decision of London and North Eastern Railway Company to purchase only British steel rails. The British steel industry also has decided to use Douglas fir for the decks and bulkheads of new battleships.

The British board of trade has agreed to use Douglas fir and silver spruce in construction of both rowing and motor lifeboats.

Rapidly Forging Ahead

Veteran Shipping Man Foresees Pacific Westing Trade Supremacy From Atlantic

Like his illustrious father, Captain Robert Bell, veteran Sir Frederick shipping man who started his career in an Ontario logging camp, A. M. Dollar, president of the Vancouver board of trade, foresees the early advent of the day when the Pacific will wrest trade supremacy from the Atlantic.

"During the past decade, the total volume of foreign trade of all the principal countries bordering upon the Pacific has increased enormously, and this process is still going on," says Mr. Dollar. "Figures covering the trade expansion of the United States, Japan and Canada, particularly illustrate that the Pacific Ocean is rapidly forging ahead as an integral part of the world's commercial routes, and today it is a definite and potent factor in world commerce."

"When it is realized that there are continents bordering on the Pacific that are practically undeveloped from a trade standpoint, one may gain some faint conception of the opportunities awaiting progressive business men of the future in this field. When you add to that the fact that the Panama Canal has opened the Pacific coast to the markets of Europe it is apparent that Pacific commerce has all the advantages of a war situation. On the Pacific coast there is a population of 856,000,000 to be served, against a population of 216,000,000 on the Atlantic."

Proposed Dairy Merger

Reported That a Company May Be Formed For This Purpose

Formation of a holding company, capitalized at around \$20,000,000, merging dairy companies throughout Canada, is mooted, according to The Ottawa Citizen, which reports that the shareholders of the "Producers' Dairy Company of Ottawa likely will be called upon to vote on entering into the combine. Under the suggested scheme a holding company for many of the dairies of Canada extending from coast to coast would be created. The chief source of capital is reported to be in Quebec, Montreal, Toronto and Winnipeg.

If the proposed venture goes through, which is considered likely, considerably more than the distribution of dairy or farm products will be undertaken. It will include such plants as manufacture of glass bottles, wooden cases used in the distribution of milk in bottles and perhaps one or more industries kindred to the dairy trade.

Whaling Industry in B.C.

Some 10,800 barrels of oil were put up by the Consolidated Whaling Company, of Victoria, as a result of operations of four stations from May to October last year. The oil will be used for the manufacture of toilet soap, tanning, tempering steel, fruit and other sprays, while blood and bone-meat are also used for the culture of flowers and fruits.

Has "Would you accept a pet monkey?" She: "Oh, I would have to ask Father. This is so sudden!"

Saskatchewan Butter Production

Total Value of Dairy Products For Province in 1923 Was \$20,945,648

Creosote butter production in Saskatchewan during 1923 showed an increase of more than 2,200,000 pounds as compared with the production in 1922, while dairy products showed an increase of value of more than \$1,500,000 in comparison with 1924.

Reports received at the dairy branch of the provincial department of agriculture show the total value of dairy products in the province during 1923 was \$20,945,648.

During the year 16,450,600 pounds of creamery butter were manufactured in Saskatchewan compared with 13,485,912 in 1922, an increase of 2,260,688 pounds. The total 1923 output is more than double the production of 1921.

The increased production is attributed principally to an increased interest in dairying coupled with the use of better cows and improved feeding methods on the part of producers," states P. C. Kidd, provincial dairy commissioner.

"Cheese-making also, while still a very small branch of the dairy industry, has taken a decided step forward and promises soon to become an important factor." During 1923 the output of cheese was 223,137 pounds, as compared with 146,000 pounds during 1922, and the value of cheese made has increased by \$17,455.

"Favorable conditions for the consumption of ice cream during the summer season caused a net increase of approximately 40,000 gallons in the quantity manufactured and sold."

"The butter industry during the past season has been the recipient of a large export from Saskatchewan to the British markets. During the year more than 10,500,000 pounds of creamery butter has been graded for export under the Dominion of Canada grading regulations. This represents a quantity more than double that graded under these regulations last year. It is difficult to give the ultimate destination of this butter, but it is safe to say that most of it found its way to the British market, where it enjoyed a strong demand throughout the season due to dependable quality in each grade."

Feed For Livestock

By-Products of Raymond Sugar Factory to Be Put to Use

By-products of the \$1,550,000 beet sugar factory at Raymond, Alberta, will make that district the great feed ground of Canada. It is declared by the Canadian sugar pulp and molasses which with alfalfa and grain make the ideal feeding combination for cattle, it is stated. Negotiations are now in progress between the sugar company and a big packing concern to produce a feed of a large batch of steers near the factory. The total tonnage of beets sliced at the Raymond factory this fall was about 45,000 tons, which will be increased materially next year. There will be about 5,000 tons of syrup and a large quantity of pulp available this winter for stockmen.

Soldier Settlers Doing Well

Prosperous Conditions in Farming Communities in Alberta

A reasonable indication of the prosperous conditions of many of the farming communities in Alberta is revealed by the fact that at the land settlement board at Calgary, payments from soldier settlers are coming in at the rate of from four thousand to five thousand dollars a day. This is regarded as most encouraging, and shows that the men are doing reasonably well. One man came in and paid up his indebtedness in full, turning in to the board the sum of \$4,600.

Never Had a Crop Failure

Horace Johnson, an old-timer of Alberta, has farmed for more than twenty years in the Champlain district, and during that time he has never experienced a crop failure though he has suffered similar to other farmers from natural causes.

Ireland-Newfoundland Air Service

The Irish papers are talking of a possible trans-Atlantic air service between Galway and St. John's, Newfoundland, which would be operated by the whole question of aviation in the Free States and its development on a civil basis is to be discussed at a conference this month.

Interest in Western Canadian Farms

There is further evidence of a growing awakening of interest in Western Canadian farm lands on the part of United States citizens. The Edmonton board of trade has received four hundred inquiries in response to its advertising of Central and Northern Alberta.

There is no redress for the man who has but one suit of clothes.

Western Wheat Straw May Soon Be Used For The Manufacture Of Paper

Sweet Clover Benefits Land

Crop Every Five Years Followed By Summerfallow Is Best Plan

The sweet clover benefits the land in at least three ways. First, it adds root肥 to the soil as the root system is quite large and decays rapidly after the plant is plowed. Next, it provides the soil with humus, and also, in the decaying roots are a source of nitrogen and, as they extend down at least two feet, there is a tendency to permit the soil to absorb water more rapidly than it would otherwise do. Third, this feature of soil improvement through sweet clover is one of very great importance in this province. Finally the sweet clover works in very close association with nodules forming bacteria. It provides these nodules or little bunches on its roots for the purpose of housing the nitrogen gathering bacteria.

In order to get the most benefit from sweet clover a system of crop rotation should be planned so that the sweet clover occurs on the land once in five or six years so that summerfallow follows the sweet clover. This summerfallowing after sweet clover is quite important as it permits time for the roots to decay and for the ground to soak up moisture and also gives one a chance to kill out any stray plants which may survive. These stray plants of sweet clover are somewhat objectionable when growing in a crop of grain.

Some farmers have attempted to use sweet clover as a summerfallow substitute, but I think it is better to plan to summerfallow a year after the sweet clover. The only way that sweet clover can be used as a summerfallow substitute is to plow the crop under about the 10th of June, before it gets too high. If the plowing is delayed the sweet clover grows very rapidly so that there is too great a mass of material plowed into the land. This causes the soil to dry out and delays the decay of the sweet clover itself and the result is a poor crop next year.—Professor Mark Canada.

Canada's Mineral Production

One of the Greatest Factors in Canada's Industrial Life

Great progress was made in Canada's mineral industry during 1923. Metal mining experienced a boom which carried production in this field far above all previous records. In a statement issued from the Dominion bureau of statistics the total value of Canada's mineral output in 1923 is estimated at \$128,440,000, an increase of \$18,577,000 above the total of \$209,552,460 for 1922, and more than the previous record of \$227,558,665 attained in 1920 when metal prices were approximately 55 per cent. higher than in the year just closed. Among the metals, the remarkable advances in the production of gold, lead and zinc were most outstanding; improvement in outputs marked the totals for silver, copper and cobalt; silver showed little change, there was an increase in the tonnage of iron ore exported from stocks at the mines.

Mining, now third in rank among Canada's primary industries, contributes extensively to the wealth and prosperity of the country. Large shipments of freight move from and to the mines; many subsidiary industries depend upon the mining industry for their prosperity. Canada's progress in the production of mineral wealth has been notable particularly in recent years and the developments in established fields, the discovery of new mineral areas and finally the surpassing of all previous records stamp the mineral industry as one of the greatest factors in Canada's industrial and commercial life.

Noted Woman Surgeon Dead

Dame Louisa Brandreth Aldrich-Blake, of London, pioneer among women surgeons, is dead. She carried on her duties almost to the last, despite intense suffering for more than a year. Dame Aldrich-Blake was dean of the London School of Medicine for Women, senior surgeon at the Elizabeth Garrett Anderson Hospital, consulting surgeon at the Royal Free Hospital, and fellow of the Royal Society of Medicine.

Oberammergau's Passion Play

Oberammergau's passion plays next will present the Passion Play in the summer of 1927, instead of 1926, as they originally planned. The war interrupted the regular decennial presentation of the play. It was last given in the summer of 1922. Subsequently the Passion players visited the United States.

That the straw annually burned on the western prairies to the extent of millions of tons will soon become of the utmost value as the raw product from which paper is manufactured seems now almost as accomplished a fact.

For several months experiments have been conducted both on behalf of private individuals and also on behalf of provincial governments to ascertain the practicability of making paper from straw. It has been demonstrated beyond a doubt that almost every kind of paper can be manufactured from straw, and negotiations are under way both in the provinces of Alberta and in Manitoba looking to the establishment of mills.

More than one process has been evolved, said to be satisfactory, and experiments dealing with straw actually used as the prairie have been successfully carried out. The process, which has been the subject of investigation by the Alberta government, is known as the Bache-Wieg process.

In a recent bulletin issued by the Alberta government it is stated in investigations were made into all known experimental processes for the manufacture of pulp from straw, and finally about two years ago the government made arrangements for a laboratory test of the Bache-Wieg process in the pulp and paper division of the forest products laboratories, Montreal, under the joint supervision of E. Parker Cameron, superintendent of the division, and John Bache-Wieg, who was co-inventor with his father in the process.

The government has studied carefully the results of these tests, and the trade commissioner has spent considerable time in the laboratory setting information at first hand. It is Carl Bache-Wieg, senior, who conceived the idea of the straw division, and it was his father, John Bache-Wieg, who owned the second ground wood pulp constructed in Norway and was long identified as an expert with many of the best known wood pulp and paper mills of the United States and Canada, having been employed in an expert capacity to increase the efficiency of the obtaining of high yields and lowering costs of production.

In 1908 Mr. Bache-Wieg recommended his experiments with straw pulp in his laboratory in the United States. He continued experimenting until he had found that by his process he could very materially increase the cellulose yield from wheat and other cereal straw.

"Muller's" analysis of straw gives the cellulose as 48 per cent; "Heyer" gives the cellulose content of straw as 51 per cent, while a German analyst gives the cellulose in straw as 49.17 per cent, but Mr. Bache-Wieg obtained his high as 75 per cent. of unbleached fibre from wheat straw, but found that the commercial yields gave the following results:

Wheat straw, 40 to 45 per cent. commercial cellulose.

Corn stalks, 40 to 45 per cent. commercial cellulose.

Flax straw, 25 to 30 per cent. commercial cellulose.

The Bache-Wieg process does not involve any radical departure from standard sulphite practice, which gives it the advantage of being able to utilize present-day standard wood pulp equipment in the manufacture of straw pulp. At the same time it requires very much less power than is necessary in the preparation of wood pulp for the reason that the marbling, chipping and grinding processes are eliminated.

Every variety of paper is capable of manufacture from straw pulp, and the semi-commercial tests have demonstrated that the quality is fully equal to that produced from wood pulp. In addition to newspaper special attention was paid to the manufacture of wrapping paper, chequing paper, bank and bottle wrappers and carton boards, for all of which there is a ready market in Western Canada. There was developed also under the process an insulating board having a distinct advantage over anything at present on the market in that it is waterproof and can be used for the lining of both water and fire-proofing. This material has met with the enthusiastic approval of architects and builders who have had the opportunity of seeing it.

Muskies Damaging Deer

A family of muskies recently encountered in a warm nest under the quarter deck of John Sheehan's fishing boat which is moored at Port Arthur for the winter, are gnawing at the barrel and may do considerable damage. The territory is a good one, and consequently it is illegal to kill the animals or put them to flight.

Around the Town

Miss E. McDonald left on
Tuesday for near Camrose to
teach school.

Mr. W. A. McDonald, of Cal-
gary, is visiting his cousin, A.
W. King.

Mr. and Mrs. C. R. Brewster
are closing Sunnycrest Farm
for the winter and have taken
a house in Edmonton, where
their children will attend the
schools.

R. J. Snell, Optometrist, will
be in Mirror on Wednesday,
Sept. 22, and every third Wed-
nesday of the month.

Messrs. Russell Dwyer and A.
Munro returned this week from
a trip over the Windermere
highway.

Insp. Bryan and family were
the guests of his son, Mr. G.
Bryan this week.

Mr. and Mrs. Panrucker left
this week for Camrose where
they will reside in the future.

Mr. and Mrs. A. Mays and
daughter, Evelyn and Miss S.
MacAnally, of Edmonton, spent
last week with Mr. and Mrs.
Watters at Poplar Beach.

Mrs. C. Sables returned on
Monday from a visit to Van-
couver and other points.

Mrs. Paton and family re-
turned to the district Monday.
Cards have been received
from Mr. and Mrs. Frank Mor-
rison from New York and
Washington where they are
enjoying a pleasant holiday.

Mr. J. F. Baugh and family
returned this week from their
trip to the coast.

Mrs. A. Moller and children
returned last Thursday from a
visit at Donalda.

The Taxis, Trail Rangers and
Beavers are holding a supper
in the Town Hall on Friday
evening at 6.30, to be followed
by a Camp Fire at the parson-
age to start off the autumn
work with a real bang.

Leon Olson with Mrs. Roper
and Gladys returned on Mon-
day to Alix.

Mrs. Golnick and daughter
returned home from Edmon-
ton last week.

What might have proved a
serious accident happened last
week when Len Clarke, in driv-
ing home from Alix, had trouble
with his lights, with the result
that he thought he saw a horse
vehicle on the road, and in
drawing to one side to let it
pass, went into the ditch. It
just happened that he was go-
ing at speed enough to right
himself—he being alone in the
car—when the two wheels on
one side of the car came off, the
car dragging about 45 feet on
the axles before it was stopped.

In order to give his patients
better service, H. J. Snell, Sight
Specialist, has made arrange-
ments with the W. L. to rent
the library building (opposite
telephone office) and will be in
Mirror on Wednesday, Sep-
tember 22nd, and the 3rd Wed-
nesday of each month thereafter.
It should be mentioned that Mr.
Snell gives special attention to
children's work, and will be
pleased to meet his old and new
patients in his new location.

Chinook Sorry to Lose Kerr Family

CHINOOK, Alta.—Mr. and Mrs.
J. T. Kerr and family left Tuesday
morning for Mirror, Alta., where Mr.
Kerr has accepted a position as
station agent. The whole district
was sorry to see them go as they
have identified themselves with
every movement for the good of
the community. Mr. Kerr was
president of the Curling Club and
one of the most enthusiastic de-
voted of the game. He was al-
ways among the foremost in town
in forwarding sports of every
kind, while in his official position
as agent was most obliging and
capable. Mrs. Ronnie and Mr.

THE WHEAT POOL AND TRADING IN FUTURES

IN the Chicago Price Current
Grain Reporter, the organ of
the Chicago Grain Trade, there
appeared early in August an article
referring to the delivery of three
million bushels of wheat on the last
day of July by the Pool to cover
sales made on the July option. The
Central Selling Agency of the Cana-
dian Pools felt at the time that
the article was not worth much at-
tention. Recently, however, it has
appeared as a paid advertisement
in the form of a cartoon in prac-
tically all of the Western Cana-
dian weekly newspapers. This ad-
vertisement was sent out by a gen-
eral advertising agency already set
up in stereotype plate forms with
the following instructions to the
newspaper:

"Do not add printers' or ad-
vertising marks of any kind
to the plate."

In view of this organized effort
to misrepresent the transaction to
the farmers of the west, the follow-
ing facts are hereby given:
On July 1st the Sales Depart-
ment of the Canadian Pool had
the existence of a short interest in
July wheat. July is the one month
in the year when there is the least
actual wheat, owned by either the
grain trade or the farmers, avail-
able for delivery and when at
tempers are most frequently met
on the part of speculators to
squeeze the market. It soon be-
came evident that an attempt of
this sort was to be made. The
Pool had in store a fair quantity
of No. 3 Northern wheat for which
there was no immediate export
sale, in competition with which
to the world market there was a con-
siderable quantity of No. 2 Hard
Winter wheat from the United
States, which was selling at from
18 to 22 cents under Canadian No.
1 Northern wheat. This attempt at
a corner soon forced the price of
July wheat up to a point where the
Pool felt they should sell some of
their wheat, especially as they
were able to sell No. 3 Northern
wheat at around 10 cents per
bushel or the price at which No.
2 Hard Winter wheat was being
sold. The "long" interests in July
wheat acted apparently on the as-
sumption that the Pool would not
step into the market at this time
and they were, therefore, naturally
surprised when, instead of being
able to force a cash settlement
with the "short" interests at the
close of the month, they were for-
ced with the actual delivery of the
wheat. With the expiration of the
July option and the pricing of the
bubble, the men who had attempted
to squeeze the market found them-
selves with a large quantity of
wheat on hand which they had
bought at the inflated July price
and which they would now be com-
pelled to dispose of in competition
with the American wheat. In the
meantime the Pool had obtained
for its members a very good
price for their wheat.

The Pool is charged with
referring to with delivery of the
wheat, yet, as a matter of fact, No.
1 Northern wheat is at the time
trading slightly above the
price at which it stood on July 1st.
The statement is also made that the
Pool had been throwing wheat on
the market during the month of
July in quantities which would
checked advances. This statement
is also disproved by the actual fig-
ures. On July 2nd the price was
\$1.49, on July 31st it was \$1.59, and
the high point reached between
these dates was \$1.62 1/2.

The charge is also made that the
Pool is speculating in futures con-
trary to its expressed principles.
The fact is that the Pool takes ad-
vantage of every available market
to dispose of the farmers' wheat
and on this occasion it happened
that the attempted corner gave the
Pool an opportunity to sell a quan-
tity of wheat which they had
actually at their disposal at a price
which was temporarily higher than
other markets offered. The Pool
was not selling paper wheat with
the object of buying it in again at
a lower price, which is the method
of the speculators, but was dis-
posing of farmers' grain, which
they had for sale.

These are the facts of the opera-
tion and show that the "long" in-
terests in July wheat lost out in
their efforts to rig the market for
their own benefit, while the Pool
had succeeded in marketing, at a
very satisfactory price, a large
quantity of wheat.

The above article issued by the
Central Selling Agency of the Cana-
dian Wheat Pools.

Miss Ennis Becomes Bride of A. McNair

A very pretty wedding was
solemnized at the home of Mr.
and Mrs. J. W. Ennis, of Alix,
on Wednesday, Sept. 1st, when
their eldest daughter, Kath-
leen, was united in marriage to
Archie Campbell McNair, of
Mirror, Rev. R. G. Wood offi-
ciating.

To the strains of the wedding
march played by Mrs. H. S.
Fawcett, of Calgary, the bride
entered the room on the arm
of her father, and looked very
glowing in a beautiful frock
of white georgette trimmed
with a deep banding of cream
Venetian lace with orange blos-
soms. In place of a veil she
wore a silver bandeau with
small sprays of orange blos-
soms, and carried a shower
bouquet of Madame Butterfly
roses and lilies of the valley.

The bridesmaid, Miss Myrtle
Ennis was pleasingly gowned
in orchid georgette with an
ecru lace banding. She carried
a shower bouquet of Laddie
carnations and mauve sweet
peas.

The groom was supported by
his brother, Mr. W. McNair, of
Bashaw. Both were attired in
the conventional black.

Following the ceremony a
buffet luncheon was served.
The bride's table was centred
with a three-tier wedding cake
effectively done in mauve, pink
and white, which harmonized
with the house decorations.

Intimate friends of the bride
who assisted in serving were:
Mrs. H. Barber, Mrs. H. G. Wil-
liams, Miss Hilda Simpson, Miss
Joan Ennis and Mrs. G. Ennis.

The groom's gift to the bride
was a completely fitted mor-
occo handbag; to the brides-
maid a white gold bar pin with
an aquamarine setting; to the
best man a gold pen knife and
to the pianist a vanity case.

Later the young couple left
for a motor trip to points in
Manitoba. On their return Mr.
and Mrs. McNair will reside in
Mirror.

McKenzie as joint hostesses en-
tertained for Mrs. Kerr at a farewell
tea Friday and Mrs. Sugley on
Monday. During the last few
days before leaving they were
dinner guests at several homes in
town. Before leaving Monday
the couple were presented with a
purse as a token of goodwill from
their friends in Chinook.
